Creating broader value through the National Lottery

Beyond the immense social impact of the NLC's grant funding work, the National Lottery has over the years had a significant impact through job creation, B-BBEE, as well as through the overnight winners it has produced. The NLC remained committed to service delivery and the upliftment of communities through our procurement strategy and expeditious turnaround times to beneficiaries. Our procurement strategy focuses on preferential procurement from designated groups, enterprise supplier development programme for small businesses, and expeditious turnaround times of payment to suppliers.
